Road Materials and Pavement Design

an international journal

Editors-in-Chief

Hervé Di Benedetto, Andrew Charles Collop, Hussain U. Bahia

2009

hermes

Lavoisier

The Journal welcomes contributions on mechanical, thermal, chemical and/or physical properties of bitumens, additives, bituminous mixes, asphalt concrete, cement concrete, unbound granular materials, soils, geo-composites, new and innovative materials, as well as mix design, soil stabilization, and environmental aspects of handling and re-use of road materials. The Journal also intends to offer a platform for the publication of research of immediate interest regarding design and modeling of pavement behavior and performance, structural evaluation, stress, strain and thermal characterization and/or calculation, vehicle/road interaction, climatic effects and numerical and analytical modeling. The different layers of the road, including the soil, are considered.

Four types of papers will be considered for publication in the Journal, namely: State of the Art, Original Scientific Paper, Scientific Note and Discussion Paper.

Example of papers published in volume 9, 2008

- Assessment of Existing Micro-mechanical Models for Asphalt Mastics Considering Viscoelastic Effects (H.M. YIN, W.G. BUTTLAR, G.H. PAULINO, H. DI BENEDETTO)
- The Morphology of Bitumen-SBS Blends by UV Microscopy. An Evaluation of Preparation Methods (H. SOENEN, X. LU, P. REDELIUS)
- Applying Data Mining Technique to Compute LDE for Rutting Through Full Scale Accelerated Pavement Testing (T.-T. CHEN, J.-R. CHANG, D.-H. CHEN)
- Effects of Crumb Rubber Variability on Failure Temperature of Crumb Rubber Modified Binders (K.M. SHATANAWI, C.C. THODESEN, S.N. AMIRKHANIAN)
- Laboratory Evaluation for Rutting Performance Based on the DASR Porosity of Asphalt Mixture (S. KIM, A. GUARIN, R. ROQUE, B. BIRGISSON)
- The Temperature Effect on the Reflective Cracking of Asphalt Overlays (M.J.C. MINHOTO, J.C. PAIS, P.A.A. PEREIRA)

The journal of *Road Materials and Pavement Design* has been selected to the following citation lists:

- Science Citation Index Expanded
- ISI Alerting Services
- Current Contents/Engineering, Computing, and Technology

Areas

Properties, analysis and performance of road and airfield materials, layers and pavement structures.

Thermal, Mechanical, Physical, Chemical, Environmental and climatic aspects of Pavement Systems.

Stress, strain and temperature response of the pavement system to traffic loading and environment effects.

Peer Review

All papers presented in the Journal will be peer reviewed by at least three recognized members of the international scientific community. To insure the highest possible degree of objectivity and impartiality Peer Review in the Journal is performed without the names of the authors being submitted to the reviewers. Whenever possible the Editors in Chief will select reviewers from different countries.

Awards

Papers published in the Journal will be considered annually by the Editors for an Award. The purpose of the award is to recognize outstanding contributions to the fields covered by the Journal. The amount of the awards may vary annually.
